Art Unit: 1774

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-11,15,16, and18, drawn to a multilayered product, classified in class 428, subclass 298.1+.

II. Claims 12-14,17,19,and 20, drawn to a process of making a multilayered product, classified in class 156, subclass 308.2.

2. The inventions are independent or distinct, each from the other because:

3. Inventions group I and group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as molding, layering, stamping, and pressing.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their
